As of 30-September-2024

Investment Objective

Generate higher than Fixed Income returns by investing in a portfolio of select 12 financial stocks.

Investment Strategy

As the share of India in global GDP grows over the next 5 years so will the market capitalization of its stock market. The mega cap stocks that are part of the Nifty Fifty Index will create tremendous wealth over the next 5-10 years as they grow their leadership and competitive moat. These companies have very stable and defensive business models. By investing in them the investor has a very high probability of making a much higher return than the current returns available from fixed income options. These stocks have been chosen carefully after detailed research and the portfolio construction is done in a way to reduce risk and optimize returns.
