

Formidable Dozen+

As of 31st Oct. 2024

• Overview

Achieve returns higher than fixed income by investing in a portfolio of 15-20 mega-cap stocks.

• Rationale

As India's share of global GDP expands over the next five years, so will the market capitalization of its stock market. The mega-cap stocks are poised to generate significant wealth over the next 5-10 years, strengthening their leadership and competitive edge. These companies operate with stable and defensive business models, offering investors a strong likelihood of earning returns far higher than those from fixed income options. Each stock in the portfolio has been carefully selected through detailed research, and the portfolio is structured to minimize risk while optimizing returns.

Min Investment	: INR 2,00,000
