## Investment Objective

Generate higher than Fixed Income returns by investing in a portfolio of select mega-cap stocks.

## Investment Strategy

As the share of India in global GDP grows over the next 5 years so will the market capitalization of its stock market. The mega cap stocks that are part of the Nifty Fifty Index will create tremendous wealth over the next 5-10 years as they grow their leadership and competitive moat. These companies have very stable and defensive business models. By investing in them the investor has a very high probability of making a much higher return than the current returns available from fixed income options. These stocks have been chosen carefully after detailed research and the portfolio construction is done in a way to reduce risk and optimize returns.

## Strategy vs Benchmark:

## Investment Universe

Our chosen universe is companies that have a market cap of more than INR 1 lakh crore and are a part of the Nifty50 Index. They are all profitable, growing, dividend paying and have a dominating presence in their industry. They have a stellar track record of generating shareholding value for more than twenty years and are managed by a team of highly successful professional managers.
